To the UH Budget and Finance committee of the Board of Regents:

Please support the movement to divest University of Hawai‘i from its monies invested in fossil fuels. Hawai‘i is already a sustainable leader for nations moving in a positive direction- if the University of Hawai‘i joined the movement, it would make a strong statement for other institutions and companies to do the same. Without forward movement on reducing fossil fuel consumption, the global warming tipping point will be reached earlier to do released greenhouse gases- very likely within the next century.

Mahalo nui for your time.
