University of Hawai'i System

## HB 1130 - RELATING TO CORRECTIONS

Chair Hashem, Vice Chair Chun, and Members of the Committee:

The University of Hawai'i supports the intent of HB 1130, which creates a Trauma Informed Care Course (TICC) designed for Adult Corrections Officers taught by WCC.

According to the Center for Disease Control, 97% of inmates have had at least one traumatic childhood experience. A large national study found that 40.1% of female inmates and 17.8% of male inmates suffer from post-traumatic stress disorder (PTSD). Other studies have found 30% of male inmates have current PTSD symptoms and 60% have lifetime PTSD. Incarceration compounds potential trauma related issues, as it is an environment where the incarcerated feel a lack of personal control over situations and their own safety. Due to this, individuals may remain in a constant state high alert due to concern for personal safety and may be triggered by perceived threats and actions and/or interactions which remind them of past trauma. This can lead to inappropriate responses, including aggression, violence, anxiety, depression and self-harm. Suicides are the leading cause of jail deaths nationwide. These impacts of trauma create a negative environment for the incarcerated individual, fellow prisoners and the prison staff.

A TICC helps those serving incarcerated populations to better manage this population through understanding the impact of trauma. Adult Corrections Officers will be provided information on the lifelong effects or trauma, recovery needs and implementation of traumafocused treatment interventions, including evidence based best practice. Trauma triggers and examples of calming and grounding strategies will be discussed to help staff conduct their work more effectively and with less frustration. Vicarious trauma impacting correctional staff and suggestions for self-care will also be explored.

This TICC positively impacts the prison environment for both workers and incarcerated individuals. This can have further positive impacts on retaining staffing due to decreased workplace frustration.

The University of Hawai'i supports the intent of HB 1130, on the condition that any funds appropriated in support of this program does not supplant any portion of the University's budget request.

Thank you for the opportunity to provide testimony in support of HB 1130.
