Michael Bruno, Provost  
University of Hawai'i at Mānoa

## SB 420 – RELATING TO SUSTAINABLE FOOD SYSTEMS

Chair Gabbard, Vice Chair Richards, and Members of the Senate Committee on Agriculture and Environment:

Thank you for the opportunity to provide testimony in support of SB 420 relating to sustainable food systems which establishes the sustainable food systems working group within the Hawai'i Department of Agriculture. The purpose of this working group is to develop an interagency food systems plan linked to the United Nations Sustainable Development Goals for a more sustainable, resilient local food economy that enhances and sustains the environmental, economic, and social health of the community.

A sustainable food system is defined as one that provides sufficient food to meet current food needs while maintaining healthy ecosystems that support continuous food production for generations to come. To ensure equitable access to nutritional food that is produced with minimal impact on the environment, Hawai'i needs to encourage the development of sustainable food systems. Our food systems need to be serving our population's health, the environmental health of our land, and the economic health of our food and agricultural sector. Hawai'i needs to be proactive in making locally produced food widely available to our population. Similar to other parts of the world, Hawai'i is especially vulnerable to natural and human disasters that may have a negative impact on our own food security. Hence, the establishment of a working group focused on making our local food production more sustainable is one we certainly support.

Thank you for the opportunity to submit testimony in support of this bill provided that its passage is in addition to and does not replace or adversely impact priorities as indicated in our BOR Approved Budget.
