

THE NATIONAL DISASTER PREPAREDNESS TRAINING CENTER

Third Thursday Virtual Event

Dependencies of Community Lifelines on Critical Energy Infrastructure

In October 2023, the Energy Office completed the O'ahu Energy System and Critical Infrastructure Vulnerability and Resiliency Assessment, a FEMA Advance Assistance-funded effort. This assessment of Oahu's primary energy supply, distribution, and demand networks and the State's critical infrastructure risks covered electricity, liquid, and gas infrastructure and the dependencies of Community Lifeline Key Customers. 28 energy hazard mitigation measures were identified in this effort with a five-year implementation plan to improve the resiliency of critical energy infrastructure.
